

COLLABORATION OF EXPERTISE FOR SUCCESS

At MGM, we believe that true success is built on the continuous collaboration of diverse expertise. By bringing together qualified professionals, modern technology, and innovative solutions, we are committed to driving excellence in every project we undertake. Our collaborative approach ensures that we not only meet but exceed the expectations of our clients, delivering optimized results that pave the way for long-term growth and sustainability in the oil and gas industry. At MGM, success is a shared vision, where every contribution counts towards achieving exceptional outcomes.

A FOCUS ON INNOVATIVE SOLUTIONS

- Driving innovation at every project phase through advanced technologies, problem-solving, and knowledge sharing.
- Tailoring innovative solutions to meet specific client needs, ensuring maximum efficiency across project lifecycles.
- Leveraging automation and data analytics to enhance project outcomes, reduce costs, and optimize performance.
- Developing engineering capabilities that can quickly adapt to the evolving demands of the energy industry.
- Implementing innovative procurement strategies and construction techniques to modernize project timelines, optimize resource utilization, and ensure cost efficiency.

- Partnering with industry leaders and technology providers to bring innovative solutions for engineering and construction.
- Enhancing project delivery through efficient processes & integrated engineering techniques.

MGM's focus on innovation ensures that we not only meet client expectations but also anticipate future industry needs, positioning us as leaders in delivering forward-looking, value-driven solutions.

BUSINESS GROWTH STRATEGY

MGM is committed to growing and delivering on its commitments through the adherence to the following values.

Integrity: Aligning all our actions with high ethical standards

Safety: Foremost in our culture and our actions

Results: Accept ownership and deliver the right things right

Team: Collaboration in a respectful and trusting way

Passion: Pride in what we deliver and achieve

PRODUCTS & SERVICES

Our offering:

1. Process Engineering – concept studies, optimization, troubleshooting, commissioning support, and training.
2. Process Safety Management – strategy development, implementation, engineering studies & audits.
3. Procurement and Construction – procurement services, vendor management, material sourcing, on-site construction execution & commissioning.
4. Systems Integration – instrumentation and control system implementation, mechanical control system integration (static and rotating) & safety system management.

5. Oilfield waste management – minimization strategies, storage, disposal strategies, assessment & logistics.
6. Oil Production Chemicals – production chemicals, chemistry assessment, laboratory analysis, chemical management & optimization.

FUTURE GROWTH

Energy production within Iraq for domestic and international supply is at a turning point. There is a strong need for the integration of technology and economic optimization with the continued investment in infrastructure, sustainable practices, and workforce development.

The MGM company is focused on the delivery of optimal solutions to meet the client needs today and ensuring that those solutions can be adapted and scaled to meet the client's.

MARKET & COMPETITION

The upstream Oil & Gas industry in the Iraq has for years been dominated by international companies.

MGM goal is to improve and maximize output of process facilities by improving their process with suitable solutions in both engineering and operation sides.

MGM offers competitive pricing with high value, particularly in areas like materials, construction, maintenance, reliability improvements, and energy optimization that can result in long-term savings for operators.

Build strong relationships with local operators by offering post-installation support, continuous monitoring, and rapid-response solutions for process optimization.

CORE TEAM

Mohammed Mahmood – CEO: Manages and directs the company toward its primary goals and objectives, especially working on developing company technical team.

S. Grunnet – General Manager: 30+ years' experience in process, process safety, and technical risk engineering across the Oil & Gas value chain.

Badradin Ali – Communication Manager: Extensive experience in development of communication strategies.

Sakar Muhammed – HR Manager: Managing every aspect of the employment process, including orientation and training new staff members.

Sivana Tariq – HSE Manager: Assessing and advising on risks arising from the workplace or work processes, applying measures to eliminate and control the risk.

Mahmood Hamadali – Project Coordinator: Experienced project coordinator with a deep engineering knowledge of the oil & gas projects.

Ahmed Bana – Lead Process Engineer: Experienced Process Engineer at the design and operations level in the Oil & Gas industry. Expertise extends to software programming and process modelling tools.

Dastan Ahmed – Process Engineer: Professional project coordinator with more than 8+ years of experience in project management and coordination.

Hemosho Meta – AutoCAD Engineer: 20+ years' experience in mechanical drafting, specializing in creating detailed technical drawings.

Stevan Ivkovic – Lead Electrical, Instrument & Control Engineer: Over 25 years' experience in designing, implementing, and maintaining electrical, instrumentation and control systems for process systems.

Hamid Ahmed – Senior Electrical, Instrument & Control Engineer: Over 20 years' experience in designing, implementing, and maintaining electrical, instrumentation and control systems for process systems.

Brwa Karim – Construction & Civil Engineering Lead: Over 10 years' experience in construction and civil engineering, specializing in managing complex projects within the oil and gas industry.

Dana Muhammad – Chemical Solutions & Waste Management Lead: Extensive, deep expertise in production chemistry and the minimization, handling and disposal of oilfield waste materials.

OUR STRATEGY

MGM's strategy in Engineering, Procurement, and Construction (EPC) is centered on delivering integrated, efficient, and high-quality solutions. We approach every project with a focus on continuous coordination across all phases, from design to execution. By leveraging our engineering expertise and a strong procurement process, we ensure that projects are completed on time, within budget, and to the highest standards. Our commitment to safety, sustainability, and operational excellence drives every decision, fostering long-term relationships with clients and stakeholders. At MGM, we aim for not just project success but also lasting value creation.

MATERIAL SUPPLY

MGM's procurement strategy is built on a strong network of trusted suppliers, ensuring that we acquire the highest quality materials and services to meet the demands of the oil and gas industry. With established relationships with most international suppliers, we have access to a wide range of products, including integrated instrumentation and mechanical equipment. This global reach allows us to source the best solutions, tailored to the specific needs of each project. Our procurement process emphasizes cost-efficiency, reliability, and timely delivery, ensuring that every project runs smoothly from start to finish. At MGM, we leverage our strategic supplier partnerships to bring latest technology and materials to our clients, driving operational excellence in every aspect of our work.

TRANSPORTATION AND STORAGE

Transportation and storage are essential to our operational efficiency, ensuring the continuous movement and secure storage of materials throughout the supply chain. We manage the transportation of materials and equipment with precision, ensuring timely delivery to project sites while minimizing costs and delays. MGM also claims its own warehouse, strategically designed to store materials safely and efficiently. This facility allows us to maintain organized inventory and ensure that raw materials, components, and equipment are readily available when needed. We take great care to preserve materials in optimal conditions, especially sensitive equipment, following to industry standards for storage. Through effective transportation and storage management, MGM ensures that our projects are always well-equipped, on time, and ready for success.

CONSTRUCTION

At MGM, construction is a basis of our ability to deliver high-quality, large-scale projects in the oil and gas industry. Our construction approach is built on suitable planning, advanced engineering practices, and a commitment to safety, quality, and efficiency. From initial groundwork to the final installation of mechanical, electrical, and instrumentation systems, our team ensures that every phase of construction is executed with precision. MGM's construction expertise spans a wide range of services, including site preparation, civil works, equipment installation, and commissioning, ensuring that each project is completed to perfection and ready for integration into operational processes.

After construction, our team precisely verifies that all systems, equipment, and processes are fully integrated and function according to design specifications. This phase involves thorough testing, fine-tuning, and optimization of mechanical, electrical, and control systems, addressing any issues or discrepancies before the system is handed over for regular operation. Our commissioning process also includes safety checks, performance assessments, and operational training to ensure smooth and efficient system startup.

SYSTEM OPERATION

Our operational teams are trained to ensure that all systems, equipment, and processes run efficiently and safely. We supply operators with the expertise to handle daily operations, perform troubleshooting, and maintain system performance at optimal levels. Whether it's monitoring equipment, adjusting parameters, or responding to operational challenges, MGM's personnel are equipped to ensure that all systems function smoothly. By offering trained and experienced staff, we help clients maintain uninterrupted operations and achieve long-term success in their projects.
